

Information Security based on ISO27K Foundation Course & Exam

Course Overview

- Provides a practical understanding of Information Security based on ISO 27002 with a Quality approach.
- Prepares students to pass EXIN “Information Security based on ISK27K Foundation” examination, allowing entry to further EXIN and external certifications.
- Exam is inclusive of course fee and comprises 40 multiple choice questions.
- Course and Exam are English language. Extra exam time allowed if English not the candidate’s first language.
- Instructors are active practitioners of ISO27000 and ITIL, draw on in-depth hands-on experience, provide real-life examples and are passionate. In most cases, the Instructors were themselves trained by the original pioneers of ISO20000 and ITIL
- Courses typically run over weekends. Especially attractive to contractors as this saves the loss of income during the training.

ITIL® is a Registered Trade Mark of the Office of Government Commerce, UK. All ISO publications are protected by copyright
